

## Definition/Philosophy

- Promote productivity
- Distraction-free work ethic
- Shorter, but focused work periods
- Time management/planning

Requirements (MVP) (Blue stickies are core features, Green are features that we plan to include that are useful)

Additional Features (These are features that we don't plan to add until the requirements are met, but that we think would fit for a better version of the app)

## Example Apps

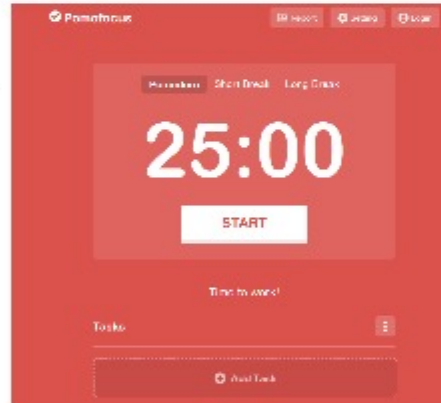

1. TickTick
- Task tracking
  - "Focus" Timer

- Directly focus tasks
- UI: simple, easy to understand
- Flow of work -> break

- Pause button not effective
- Forces you to manually start break

2. pomofocus.io
- Primarily timer
  - Option to add tasks

- Ability to set long break time
- Timer is main functionality of the application

- Color scheme
- Too cluttered; Distracting

3. Forest
- Similar concept where you set a time to focus and if you give up, your tree dies

- Satisfaction aspect
- Incentive to earn trees by focusing

- Not a pomo timer
- Ability to change focus time to whatever

## Theme/Mood

- Nature theme
- Minimal
- Fire Theme

## User Stories (Drafting brainstorm)

- Older/Unfamiliar with technology: Pomodoro timer that easily understand
- Student: Working on school work
- Self-employed: Self-motivated work ethic (Incentivizing)
- Office Workers: Usable at work
- Parent using for child: Notification while not attentive
